

Mi Bluetooth speaker

Switching on/off

Press and hold the multifunction button for 3 seconds (see the figure), after which you will hear an audible alarm and see a blue light, which notifies about the switching on of speakers and pair it with other devices via Bluetooth. Press and hold the multifunction button for 3 seconds, you will hear a sound and see a blinking blue LED that indicates the device off.

If you enable a speaker, but do not connect it to other devices via Bluetooth, the red LED will blink, and after 10 minutes a speaker will automatically switch off. This

feature helps to save energy.

Note: To play music, you first need to be sure to connect the speaker to any device. In this device, you can not adjust the volume of the music, it can be done only on devices from which you directly play this music.

Press and hold a button for 3 seconds

Micro USB

Press and hold for on/off

Press for play/pause

Pairing with smartphone via Bluetooth

1. Put a device in the vicinity of the smartphone, the distance should not exceed 10 meters.
2. Make sure that the speaker is turned off. Press the On / Off button and hold it for 3 seconds and then starts flashing red light, indicating the start of the synchronization of devices.
3. Turn on Bluetooth on your phone and start the search for Bluetooth devices.
4. At the end of the search, select «Mi Bluetooth Speaker», after which you will hear an alarm sound. Thus, you will know that the pairing of devices is successfully completed.
5. After disconnecting the device from the speakers, you will again hear an alarm sound. The indicator lights up red and blue, it will indicate that the new smart phones, or other devices can be connected to a speaker. If you turn on the device, a speaker can automatically connect to a smartphone or other device.

Less than 10 meters
